ALL ABOUT WEBKEE

The much talked about webkey is a revolutionary concept but few companies understand its benefit. Here is a reminder of the advantages and uses of the webkey to improve the ROI of your advertising campaigns.

Webkey, what is it ?

In principle it looks exactly like a USB drive. It plugs into the USB port of your computer in the same way.

The difference is that the Webkey has no memory capacity because it is not used to store data. It is programmed with the URL of your choice, and this page will automatically open after inserting the key.

1/ CONNECT
THE VIRUS FREE WEBKEE
TO THE USB PORT OF YOUR
COMPUTER

2/ ACCESS
THE URL PROGRAMMED
TO OPEN AUTOMATICALLY IN
YOUR BROWSER

3/ ANALYSE
THE EFFICIENCY
OF YOUR CAMPAIGN
IN REAL TIME !

The advantages:

- **The price!** It is much cheaper than a USB drive because it has no memory
- **The modernity:** today, storage and data transfer is conducted almost exclusively over the Internet, or "Cloud". The webkey offers direct access to this data stored in the cloud, and at half the price!
- **The measurability:** We provide a statistical tool that lets you know who is connected, when and how many times.
- **The adaptability:** Our Webkee's are manufactured to integrate with your printed media to create interactive and engaging media: Stick-it is an adhesive webkey, P@per has an embedded webkey, so light and slim that it can be inserted into an envelope or even stuck to a flyer.

WEBKEE

THE KEY TO THE WEB

- USB flash drive with no memory capacity, once plugged in, it is automatically programmed to open the URL of your choice
- Main advantage: the price is much lower than a normal USB flash drive as it has no memory
- Physically distribute access to your online documents: CV, business card, brochures, catalogues, instructions for use, website, etc.
- Universal: it works with all operating systems (except Linux)
- Automatic: just plug into the USB port of a computer, it does the rest

PURCHASING GUIDE FOR CHARGERS

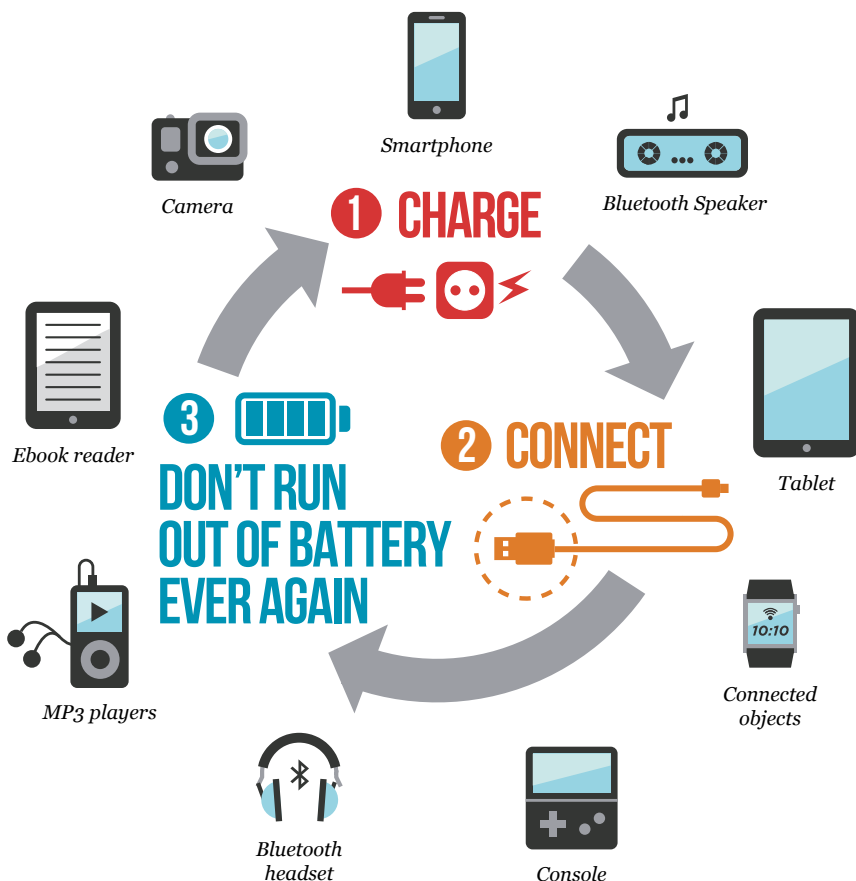

What are they?

A USB Power Bank is a mobile device that **can recharge your digital devices** on the go when there is no power nearby. They exist in numerous models and a wide variety of capacities.

Here are some tips to help you find your way around when purchasing.

How does it work?

- 1- **Charge** the power bank by plugging it into a power source before taking it anywhere.
- 2- **Charge** all kinds of digital devices via the universal USB cable wherever you are.
- 3- **No more battery failures!** Now enjoy a non-stop power supply.

How many mAh ?

The milliamp ratings represent **the quantity of energy stored** in your external battery.

Choose a capacity at least equal to or greater to the digital device to be topped up.

E.g.: An iPhone 8 battery has a capacity of 1820 mAh. A 2200 mAh power bank will fully charge your iPhone.

Smartphone	mAh	Tablet	mAh
IPHONE 8	1 820	NEXUS 7	4 000
SAMSUNG GALAXY S3	2 200	SURFACE	4 000
NOKIA LUMIA 1020	2 000	GALAXY NOTE 10.1	8 200
SAMSUNG GALAXY S6	2 550	IPAD AIR	9 000
IPHONE 7	1 960	NEXUS 10	10 000

How many A's?

Amperes determine the speed at which the power bank will charge your digital device.

Select a power bank whose Ampere rate is close to that indicated on your device's AC adapter.

Smartphone

Tablet

10 000 - 5000 - 4000 mAh

POWER BANK EXECUTIVE PRO

A HUGE CAPACITY AND POWER FOR PROFESSIONALS

- Stylish and high value designed Power bank
- 5000 & 10000 mAh models are provided with 2 ports
- The maximum power on each USB port and the internal smart charging system enable you to charge simultaneously and quickly both smartphones and tablets
- Thin and soft design for a huge capacity from 5 000 to 10 000 mAh enabling you to fully charge your smartphones completely several times and to fully charge at least once your tablet. Matt ABS treated body, charge level meter and internal smart charging system
- Micro USB charging cable included

THE PAPER CARD

Presenting a range of paper cards with an embedded USB device and a capacity of up to 32 GB of data.

PROMOTIONAL GIFT
AWARD 2013

Why Paper?

Paper combines the advantages of printed and digital media. Distributing printed material with a USB drive allows you physically to transmit relevant information and improve the impact to your communication through the addition of documents, digital files or web links.

How do I use Paper?

- Distribute **multimedia-advertising cards**: Sometimes a video or an image can have more impact than words! Paper is the first advertising card which you can directly add your videos, presentations, annual reports etc. An asset to better communication and to better sales.
- Create **interactive business cards**: transmit information about yourself or your company simply by handing out your card.
- Send **connected mail**: Double the effectiveness of your promotional mailing thanks to the Paper version of Webkey: a Plug and Play USB key with an automated link to your website, great for communicating an online contest, coupons, etc.
- Educate through an **informative card**: Boost the impact of your awareness or information campaigns. The printed content can summarise your message and the USB drive distributes the multimedia data.

P@PER, THE PAPER USB CARD

THE FIRST PAPER USB CARD!

- Super slim paper USB card, light and ecological
- Integrating a USB drive to facilitate communication of your flyers, business cards, manuals or technical instructions
- 2 chip sizes available
- Large choice of card formats, full colour printing on both sides with an easy to detach USB chip
- Card printing service, various formats, glossy or matt finish - Printed on 450 gr paper
